### **DETAILED ACTION**

1. Claims 1-24 are pending in the present application.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "stress-test information database" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 1-24 the following limitation is not described properly in the disclosure "stress-test information database" [note: independent claim 1 line 1; independent claim 13 line 2]. On page 6 lines 8-10, the specification states the following: "The inventive virtual oven system may also utilize an **inventive database**. In particular, **the database invention** includes a **stress-test information database** stored in a computer-readable medium and usable for storing information related to a stress-test of different products ..." It is unclear from the description as to whether the "inventive database" is equivalent to "the database invention" and how this relates to "a stress-test information database". The disclosure appears to state that the database invention encompasses a stress-test information database. Also the drawings do not appear to depict the stress-test database. The disclosure does make reference to the

Art Unit: 2167

inventive database 400, see page 30 lines 7-8, and figure 11; but does not appear to equate the stress-test information database to this element.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-24 the following limitation is vague: "stress-test information database". It is unclear as to whether the stress-test information database is reference character 400, the inventive database see page 30 lines 7-8 and figure 11.

### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection. In the response Applicant argued the term "command" in claims 2-5 and 14-17 is not vague. Applicant's comments regarding the meaning of the term are convincing, therefore they rejection under 35 USC 112 second paragraph has been dropped. In view of Applicant's comment regarding prior art references Grey et al. and Eliashberg et al. the rejections cited under 102(e) and 103(a) are overcome, however a new rejection has been made under 35 USC 112 first paragraph note citations supra.
